LAVASOFT

Ad-Aware *Internet Security* GAME EDITION
anti-virus + anti-spyware + anti-rootkit

Who's Playing You?

Fraud, thievery and malware are running rampant in online games and virtual worlds. Between November 2008 and August 2009, the amount of threats in one family of malware aimed specifically at plundering passwords and harvesting log-in details from online gamers increased by over 600 percent, according to Lavasoft Malware Labs.

Gamers and online entertainment fans struggling to find the right security solutions to keep them safe while they spend long periods of time connected to the Internet need to look no further. Ad-Aware Game Edition offers complete malware protection, that won't get in your way – no interruptions, no breaks in security, and no bogging down of your machine's resources. Stop worrying about your security, and get your head back in the game…game on!

★ KEY FEATURES ★

Complete Malware Protection
A power-packed combination of our pioneer anti-spyware technology together with traditional anti-virus to provide comprehensive malware protection, including protection against virus, spyware, blended malware, Trojans, rootkits, hijackers, keyloggers, and much more.

Do Not Disturb Mode
Stay protected while playing games or watching movies online in full screen mode – without the annoying interruptions or strain on system resources that other security software programs cause. Do Not Disturb Mode suspends security alerts, system scans and auto-updates while you are working or playing, without compromising security.

Minimal Strain on System Resources
Need for speed? Improvements to computer resource usage mean you have protection that won't slow your computer down.
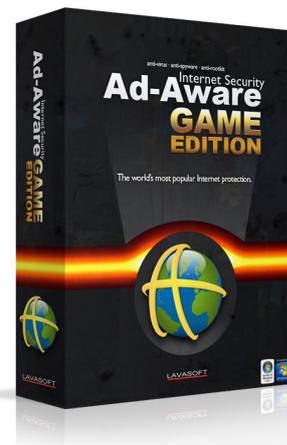

Ad-Watch Live! Expert
Ad-Watch Live! Expert gives you an additional layer of security by blocking connections to blacklisted IP addresses. It also adds process protection including behavior-based heuristics scanning, registry protection, and real-time network protection – without the strain on system resources.

Genocode Detection Technology
Based on heuristics, Genocode allows Ad-Aware to stay one step ahead of today's ever-evolving threats, as well as threats that have not yet been created, to stop malware before it can attack your personal information.

The Scheduler
Automatic scans set to your personalized schedule optimize time and resources. If used in combination with Lavasoft SmartSet, all you have to do is 'set and forget'.

KEY FEATURES

- Anti-virus + anti-spyware
- Ad-Watch Live! Expert real-time protection
- Genocode detection technology
- Behavior-based heuristics detection
- Rootkit removal system
- Do Not Disturb Mode
- The Scheduler
- The Neutralizer malware removal tool
- Download Guard for Internet Explorer
- Minimal strain on resources
- Simple Mode/Advanced Mode
- Customizable profile scans
- Pin-point file scans
- External drive scans
- Lavasoft SmartSet
- Automatic threat updates
- Free technical support

SYSTEM REQUIREMENTS

- **Processor:** P733 MHz or better
- **RAM:** Minimum 512 MB
- **Free hard disk space:** 300 MB free space recommended
- **Operating Systems:**
  Windows 7 (32 and 64-bit)
  Windows Vista (32 and 64-bit),
  Windows XP (32-bit),
  Windows 2000 Pro
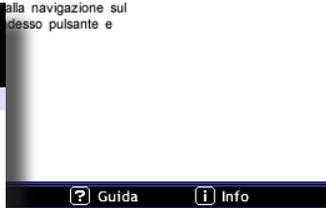

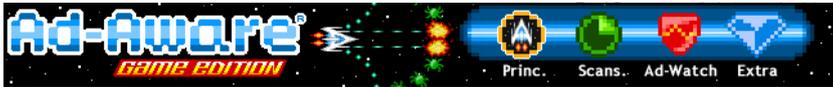

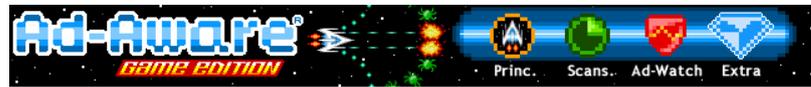

> " *Online gaming has become a massive industry over the last decade. Industry statistics tell us that in 2008, Western consumers, alone, spent over $1.4 billion on gaming subscriptions. With so many users and so much money involved, malware writers have the perfect opportunity to cash in on online games and virtual worlds.* "

Albin Bodahl, malware analyst at Lavasoft Malware Labs

According to Lavasoft Malware Labs, between November 2008 and August 2009, the amount of unique threat signatures added to the **Win32. TrojanPWS.Onlinegames** *family of threats – made up of malware aimed specifically at plundering passwords and harvesting log-in details from online gamers – increased by over 600 percent.*
